PLIER WRENCH

Klein's Plier Wrench functions as an adjustable wrench on flat-sided fasteners as well as a pump plier for pipe and other round objects. Its reversible jaw provides smooth parallel jaws characteristic of traditional plier wrenches, with the added versatility of knurled teeth on the reverse side when extra bite is needed. Handle lever provides unique and efficient adjustment.

HIGH LEVERAGE DESIGN PROVIDES STRONG HOLD ON WORKING PIECE

HIGH-LEVER RATIO provides exceptional grip when holding or bending various workpieces

HANDLE LEVER ADJUSTMENT minimizes hand travel and allows adjustment in confined spaces

MAXIMUM VERSATILITY with 2" max jaw opening and 20 adjustment positions

PARALLEL JAWS provide secure and smooth gripping of nuts, bolts, and miscellaneous workpieces

KNURLED TEETH on reversible jaw provides extra "bite" when working with conduit and pipe

TWO TOOLS IN ONE

OFFERS BOTH PARALLEL JAWS AND V-JAW FOR DUAL FUNCTIONALITY

REPLACEMENT JAW available (Cat. No. 53010J)
